

Briefly, the land becomes a chess table, and each unit of the Villa standing on sphere wheels become The

character moving freely among the property.

Sphere wheels under the units that allows the Villa to orbit around itself or move horizontally among the land. This movement is automatically programmed to orbit in parallel with the sun letting no direct light and heat to the Villa

CAMEL unit is mainly the same for all Villas, it contains water, storage, sanitar, kitchen, batteries, technical room, etc...

Solar panels on top of the villa that feeds the batteries stored in the CAMEL unit

- 3 Steps to construct Villa with no shadow
- Step 1: Units of 2x2sqm built in mass production + glass + walls
  - Step 2: Customer choose the size of the house, the number of floors, and how much privacy which is determined by replacing glass with walls.
  - Step3: Units are shipped to the destination and put together in site in a max total of 5 working days..

Each unit fits to the other like puzzle, which is a key element in modularity and expandability of the Villa.

Other than orbiting , the sphere wheels adds safety to the Villa in case of Earthquakes, the gears are set to neutral. This keeps thi Villa in place while earth is moving.

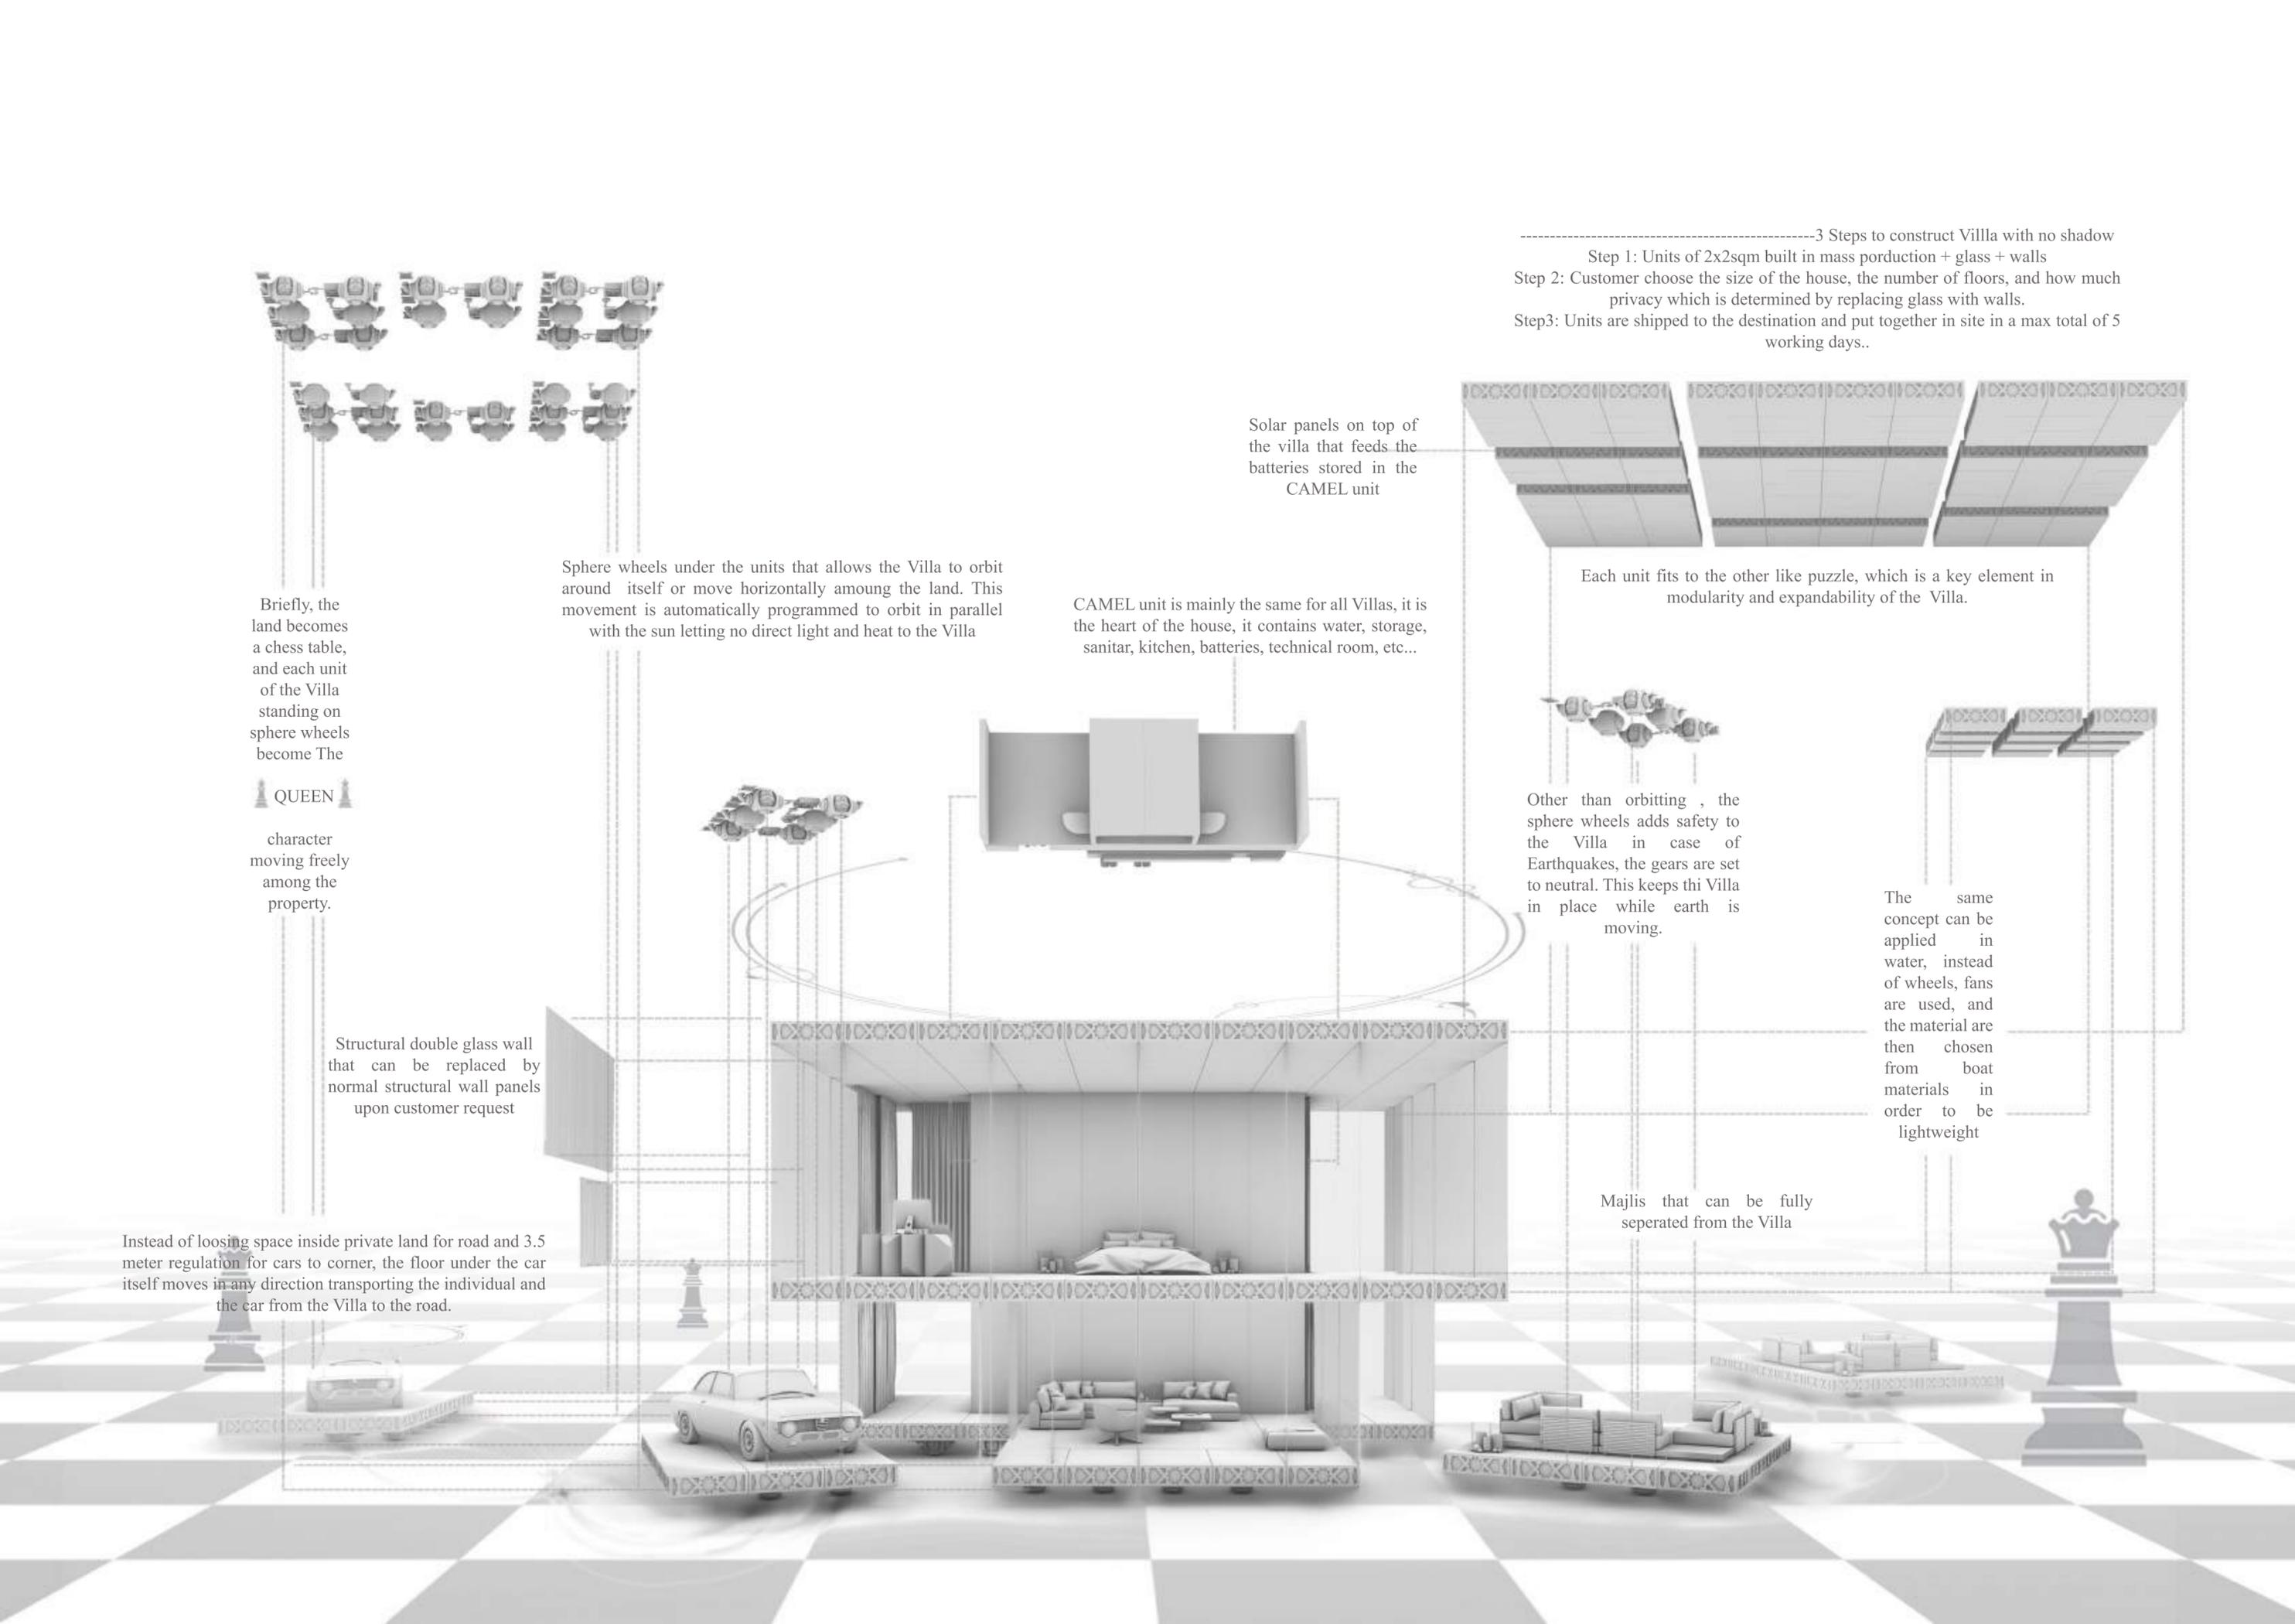

The same concept can be applied in water, instead of wheels, fans are used, and the material are then chosen from boat materials in order to be lightweight

Structural double glass wall that can be replaced by normal structural wall panels upon customer request

Instead of loosing space inside private land for road and 3.5 meter regulation for cars to corner, the floor under the car itself moves in any direction transporting the individual and the car from the Villa to the road.

Majlis that can be fully seperated from the Villa

VILLA  
WITH NO SHADOWS

# VILLA

WITH NO SHADOWS

If you can't move your feet off the ground, move the ground itself. Villa with no shadow is visionary residence of Villa is its unique ability to orbit around itself ensuring that no direct sunlight ever touches its interior living area unless desired from the residents. It is a place where shadows are but a memory. It sets the stage for a life generations to come can bask in the serenity of a shadowless, sustainable haven. The Villa with no shadows is destined for future Emirate families, setting a new standard in sustainable, high-end living. The defining feature area unless desired from the residents. It is a place where shadows are but a memory. It sets the stage for a life generations to come can bask in the serenity of a shadowless, sustainable haven. The Villa with no shadows is -bility and uncompromising elegance. It beckons the next generation to a lifestyle where the sun is harnessed as by choosing between simple cover as curtain or replacing the whole glass with walls. This translucent freedom empowers individuals with the choice to embrace the world into their personal sanctuary at will, reflecting the spirit of autonomy and choice that defines contemporary living in the Emirates. Imagine a life unrestrained by boundaries, where home is as felxible as dreams, with mobility technology and sustainable principles, the movable Villa with no shadows defies the notion of settling down because, inthis dynamic world, THE WORST WAY OF SETTLEMENT IS TO SETTLE
